The class focuses on the anterior portion of Abdominal Therapy, based on the work of Dr Rosita Arvigo. Initially, you'll be given your own self-care tools. As you experience this work in your own body, you'll gain a unique perspective of these effective Abdominal Therapy techniques. You'll then learn to apply these techniques in a professional capacity for your clients.

You'll need to be a professional therapist who holds a qualification in anatomy and physiology, and able to perform massage on clients within the legal requirements of your state and country.

ATC offers a uniquely integrative approach to abdominal and pelvic health with focused anatomy and physiology. It supports its practitioner members with extensive educational resources, mentorship, website listing and community.
